

Product and News Source For All Your Municipal Needs

# MUNICIPAL Connection™

Published: June and September

The **Municipal Connection** provides you an outstanding resource to research equipment, products and services you use in your every day operations.

**Municipal Connection** is filled with timely information from leading manufacturers and companies who provide products and services to the municipalities. Each issue includes a featured city project, news stories, association news and an announcement section for new products, services and people that are pertinent to the public works sector.

**Municipal Connection** is circulated as a **print** and **digital magEzine** nationwide to a qualified list of municipalities, public works, governmental offices, state/county DOT and heavy and street contractors. Our digital magEzine is an exact replica of the print magazine, except our digital readers receive it via email approximately 10 days earlier, giving them an advantage to see up-to-the minute products and services available to the municipal area.

Visit our Website [www.municipalconnection.com](http://www.municipalconnection.com) to locate products and services available, latest news, association news, trade show calendar and much more.

**Municipal Connection is the total product and news source for all your municipal needs.**
